## **Automatic Scales**

#### **Total Effort After Each Test**

## Today's Demo

Determine the Data Process Create a "Virtual User" to be tested Update our Virtual User to Define our load test ensure data coverage Run our load test Analyze our Results

### Our Friend Fiddler

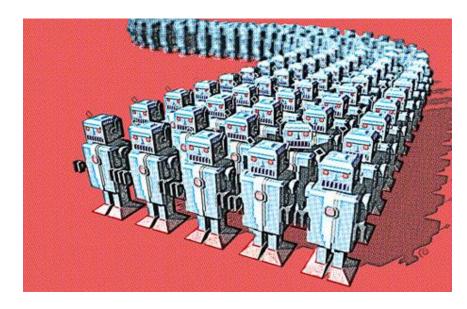

- Free to use software
- Allows investigation of web traffic
- Available at http://fiddler2.com

## Parameterization

### Resources

#### Alternatives

- Jmeter <a href="http://jmeter.apache.org/">http://jmeter.apache.org/</a>
- Jenkins <a href="https://jenkins-ci.org/">https://jenkins-ci.org/</a>
- Custom Load Testing Software

#### Links

- BPC Load Runner Toolkit http://scn.sap.com/docs/DOC-25732
- HP LoadRunner Demo http://www8.hp.com/us/en/softwaresolutions/software.html?compURI=1175451

# **Testing Types**

Test	Used to Determine
Load	System performance under expected load
Stress	Upper limit of system capacity
Endurance (Soak)	If the system can continuously handle the expected load
Spike	System response to a sudden load increase
